1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

2. Claims 1, 5, 7,8, 10-13, and 18 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. More particularly, the Examiner notes that applicants have not pointed out where either express or inherent support for the newly presented limitation in the last three lines of claim 1 can be found, and since the Examiner cannot find any such support as well he can only conclude that the aforementioned claim amendment is new matter.

3. Claims 1,5,7,8,10-13, and 18 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Luhman et al '397, substantially for reasons already of record, particularly in Paragraph No. 7 of Paper No. 032504, together with the following additional observations. More particularly, upon reconsideration it is believed that in the absence of a suitable showing which has not yet been provided applicants' claims are so broad, particularly in the great ranges of each of their roughness based parameters as to inherently read upon a significant number of the embodiments disclosed by the reference, even though a significant number of the reference's embodiments deal with "low stick and slip friction" (e.g. Abstract). Additionally, the newly added limitation concerning the roughness of the remainder of the surface is also believed to be clearly inherently present or rendered obvious by a

significant number of the reference embodiments (e.g., Col 2, lines 50-55). Finally, the Examiner again notes that with respect to obviousness his statement earlier during the prosecution that "while the reference is generally directed to "low stick and slip friction with respect to the adhesive film strip (Abstract) it is more directed to how to adjust the frictional coefficients so as to obtain the desired frictional, i.e. roughness characteristics , which are selected for the claimed article" is still believed to be particularly pertinent, particularly in the absence of a suitable showing.

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
